5<sup>th</sup> April 2006

Dear Hazel,

**RE: EU DIRECTIVES 2002/95/EC (RoHS) & 2002/96/EC (WEEE)**

Following a recent audit we are able to confirm that products supplied to your company are compliant with the RoSH Directive.

The EU committee are drafting up a completely separate Battery Directive which supersedes both the RoSH & WEEE Directives for the disposal / usage of batteries. At this point it is only in draft form. It will be two years until the Directive is implemented and a further two years until it becomes law. This new Directive is focused on the safe disposal and where necessary the complete banning of certain chemistries in some industries.

CAB are very aware of the importance of this new Directive and are being updated as and when new information is available by our main supplier Saft UK.

If I can be of any further assistance please do not hesitate to contact me.

Yours sincerely,

Mrs Jacqui Thomas  
Administrator
