Dear Hazel,

## **ROHS DIRECTIVE 2002/95/EC**

In response to, and in preparation for our compliance to the above directive Harvard Engineering PLC are able to confirm that, flame retardants PBB (polybrominated biphenyls) and PBDE (polybrominated biphenylethers), Cadmium, Mercury and Hexavalent Chromium are not intentionally added to any of our products. Any of the restricted materials mentioned can only be found in trace amounts through raw material impurities.

Further, we hereby confirm that in line with our ISO 9001/2000 change control processes and procedures all reasonable steps have been taken to confirm materials and components supplied to Harvard also comply with the above directive.

Fully compliant production builds are now underway following extensive capability trials to guarantee product compliant performance. All products sold will be phased through said processes over the next month to facilitate the cleansing of Non RoHS compliant stock prior to end of April 2006.

Any orders placed post April 2006 will be compliant to RoHS and identified as such on packaging materials as appropriate.

Yours faithfully

For and on behalf of  
HARVARD ENGINEERING PLC

Steve Cotton
